# Are You Choosing the Best Clearinghouse Partner?

Your EDI solutions are only as good as the network that supports them.

When you purchase solutions to facilitate electronic data interchange (EDI), you're also choosing a clearinghouse. These decisions are equally important since your solutions' functionality can be either maximized or limited by the network's capabilities.

To choose the best clearinghouse, evaluate potential partners on these five key attributes:

Connectivity

The depth and breadth of a network matters. If you don't have the direct access you need, you'll have to band-aid your processes and could end up with inefficient and costly EDI.

Analytics

Advanced analytics streamline the flow of EDI for maximum operational-and-cost efficiency. Make sure the network advances (vs. hinders) the flow of transactions.

Experience

There's no substitute for industry experience. You need a partner who has encountered a multitude of obstacles and barriers, can address complex problems that arise, and who can help you clear hurdles.

Innovation

When you choose a proven leader that continually invests in innovation, you automatically learn of new and better ways of doing business and don't have to worry about switching vendors to obtain the most advanced solutions and capabilities.

Security

Healthcare data breaches are costly; each lost or stolen record costs an average of $141, with the average breach totaling approximately $3.62 million*. Industry accreditation and certification are essential.

The Best Choice in a Clearinghouse Partner: The Intelligent Healthcare Network™

Change Healthcare Offers:

Unrivaled Connectivity

Our network is the largest financial and administrative network in the U.S. healthcare system. Our broad connectivity includes:

- 5,500 hospitals
- 600 laboratories
- 60,000 pharmacies

- 800,000 physicians
- 130,000 dentists
- 400 vendors

- 2,100 payers, including 92% of the top 25 health plans covering 175 million lives

Advanced Analytics

Our extensive repository of rules/logic and robust data help improve coding accuracy and reduce costs. We don't just move your data from point A to point B, but rather connect better data with the correct end-points to accelerate the revenue cycle.

In-Depth Experience

We process 12 billion healthcare transactions annually, including an estimated $2.0 trillion in healthcare claims, and we touch 1 in 5 patient records in the U.S.

Continuous Innovation

Change Healthcare is an industry leader in meeting the needs of providers, payers, and partners. Prime examples include our introduction of enterprise-scale blockchain technology to the healthcare market, our recently-developed infrastructure to support Medical Claim Attachment EDI, and our new API development.

Security

Change Healthcare recognizes that security is key and maintains industry recognized accreditations and certifications, including CAQH CORE Phase I, II, and III; HITRUST CSF; EHNAC HNAP-EHN; EHNAC DTAAP-HISP Privacy & Security; MHCC certified EHN; and NCQA.

Our Solutions Include:

For Providers and Payers:
- Claiming & Remittance
- Eligibility & Patient Access
- Medical Claim Attachments
- Developer Platform

Payer-Specific:
- Claims Automation
- Advanced Claim Management
- Payer Connectivity Services

Provider-Specific:
- ConnectCenter™
